Skye

The most recognized name in hardbanding wire:

Hardbanding Solutions by Postle Industries
now provides the industry's most advanced
hardbanding unit:

Skye Hardbanding Equipment

'Scottish Engineering with an American Heart'

Through the business acquisition by Postle Industries of Hardbanding Solutions Europe, Scotland, Postle now has direct access to the most advanced hardbanding equipment in the industry. Seven years of research, design, and engineering development has produced a range of state-of-the-art hardbanding machines which are already changing the hardbanding market.

Skye Hardbanding equipment is engineered in Scotland and supplied in the United States by Postle. The Skye USA range is specifically designed for the US market with over-engineered components for low maintenance and consumable parts available locally for fast delivery.

We are in the perfect position to assist the industry with Technical Support, Training, Skye Hardbanding Equipment, and of course Duraband® NC and Tuffband® NC hardbanding wires.

Skye is available as a stationary
in-plant unit
or
SkyeGo containerized portable
hardbanding system

Skye Hardbanding Equipment – Unique Features and Benefits
